

Eurofins Qualitech AG is an accredited technical service provider in the field of 'Materials Sciences and Quality Inspection'. We employ over 75 people across Switzerland at our sites in Mägenwil/ AG, Winterthur/ ZH, Altenrhein/ SG, Brugg/ BE and Châtel-Saint-Denis/ FR, and offer sustained expertise and customized services for damage and material analysis, mechanical and non-destructive material testing and quality assurance, industrial computed tomography, and metrology and calibration.

Since July 2021, Eurofins Qualitech is part of Eurofins Scientific SE, a leading international laboratory group with 62,000+ employees at over 900 locations in 62 countries.

As part of the strategic and operational expansion of our Business line 'Non-Destructive Materials Testing', we are offering a unique opportunity at our head office in Mägenwil as

Head of Digital Radiography (DR) & Computed Tomography (CT) (m/f/v) 80% - 100%

Your tasks ...

- Lead and develop Eurofins Qualitech's service line Digital Radiography & Computed Tomography with full managerial responsibility
- Drive technology and business development in collaboration with internal and external stakeholders towards profitable new services and markets
- Execute digital NDT services and ensure best possible accuracy and conformity in all activities in co-operation with quality management and NDT test supervision
- Ensure state-of-the-art competencies and test equipment in the areas of DR & CT

What we expect from you ...

- Entrepreneurial mindset combined with technical expertise in Materials analytics and Quality assurance
- Engineering degree and/or advanced technical background in Non-Destructive Testing and Quality assurance in an industrial environment (e.g. metalworking, welding technology, foundry work)
- Proven experience in Digital Radiography (e.g. DIN EN ISO 9712)
- Experience in the field of industrial Computed Tomography (iCT) is an advantage
- Strong customer orientation and confident demeanor combined with hands-on mentality and good communication skills in German and English
- High degree of independence and sense of responsibility

You can look forward to ...

- A challenging and varied job in a dynamic and exciting technology environment with high degree of entrepreneurial freedom
- Working with competent and motivated colleagues and employees
- The opportunity for continuous training and personal development

Do these varied tasks appeal to you? Then we look forward to receiving your application documents by e-mail to jobs.qualitech@me.eurofinseu.com
